

Ladies and Gentlemens Favourites

The feet can easily be forgotten when taking care of the body, especially during the winter months. Enter the medical pedicure at Feet for Life conducted by a state registered podiatrist and chiropodist Junaid Ahmed. With his scalpel (don't be alarmed!), Dr Ahmed expertly and painlessly slices away all dry, cracked skin from feet. Toes are then sandblasted, and the treatment ends with a relaxing foot massage. Feet are left groomed, without any hard skin, with toe nails buffed and shined to perfection.

Feet for life is an acclaimed clinic that has been established for 15 years and offers a full range of traditional treatments as well as the latest innovations in foot care for both men and women. There's even an in-house surgeon for more complicated procedures such as bunion removal or flat foot construction. It's no wonder Royal families from around the world (the UK included) are devotees of Feet for Life.
